Email: swaleheyahaya62@gmail.com

Executive Summary

Forecasted Africa worked in 2025 to strengthen water justice, climate resilience, and community-led development in Arusha District. The organization focused on baseline research, community engagement, and early-stage partnership building.

3 villages engaged, 180–250 community members reached, and 6 community meetings conducted.

Key Activities 2025

Community Engagement	6 meetings conducted with farmers, women, and youth groups
Baseline Research	Household surveys in 3 villages
Stakeholder Engagement	Initial discussions with local leaders
Institutional Development	Monitoring and reporting systems established

Early Outputs & Impact

- 3 villages engaged in Arusha District
- 200+ households indirectly represented
- Increased awareness on water governance
- Baseline framework developed for future scaling

Financial Summary (Estimated)

Field Activities	55%
Research & Data Collection	25%
Administration	10%
Partnership Development	10%

Conclusion

2025 was a foundational year for Forecasted Africa. The organization built community trust, collected baseline data, and established systems for future scaling of water justice and climate resilience programs.
